SUMMARY

Software engineering and game development student with hands-on experience building real-time graphics, vehicle systems, artificial intelligence, and interactive applications using C++, C#, Unity, Vulkan, and HLSL. Strong foundation in data structures, systems programming, debugging, and translating ambiguous requirements into working software.

TECHNICAL SKILLS

Languages: C++, C#, SQL, HLSL, JavaScript, HTML, CSS

Technologies: Unity, Vulkan, Unreal Engine, URP, Git, GitHub, Visual Studio, CMake

Core Knowledge: Data Structures, Algorithms, Object-Oriented Programming, Systems Programming, Software Engineering, Relational Databases

TECHNICAL PROJECTS

Vulkan Graphics Pipeline — C++, Vulkan, HLSL

Open Lot: After Hours — Unity, C#, Vehicle Systems
2025–Present

- Developing an open-world driving application featuring vehicle physics, artificial-intelligence traffic, camera systems, user interfaces, and environmental effects.

Torque Legends — Unity, C#, Vehicle AI
2026–Present

- Built racing systems involving AI opponents, track navigation, collision behavior, physics tuning, and reusable gameplay components.

PROFESSIONAL EXPERIENCE

Automotive Sales Specialist — Holler Drivers Mart
Orlando, FL | March 2026–April 2026

Hospitality and Bar Support — Mathers Social Gathering
Orlando, FL | October 2025–Present

EDUCATION

Bachelor of Science in Game Development — Expected 2027
Full Sail University, Winter Park, FL

Associate of Science in Game Development — 2025

Relevant Coursework: Data Structures and Algorithms, Software Engineering, Systems Programming, Computer Graphics, Computer Organization and Architecture, Discrete Mathematics
